### BAREFOOTED PROPRIETY.

A question of bare feet and knicker backers is agitating the school circles of Fitchburg, Mass. It was brought up by a female teacher who sent home a small. bare-legged boy on a hot day. She objected to the length of exposure between points where the boy left the ground and where his brief divided garment began. The boy's father " made some stir over the matter," and the School Committee took it up.

Since then New Englau I cloquence and New England prinness have waged wordy wat, and much seems destined to hang on the issue. A committeeman who had not forgotten the comfort of his own barefooted days argued, almost with tears, against the tracher's too severe ideas of propriety. He quoted with effect the words of the good old Quaker poet :

I was once a burefoot boy.

But he didn't quite carry the day. The jury was not bribed. question went to the Visiting Committee, and pending their decision the boy goes into stockings. The case takes rank at once with that of the Brooklyn School Commissioner who not long ago proposed to revise Longrentow's "Launching of the Ship " in the interests of morality. The world holds its breath while great minds grapple with issues such as these.

DIRECTORS UNEASY UNDER FIRE. The Railroad Directors who are on trial as a part of the endeavor to fix the responsibility for the Fourth Avenue Tunnel horror of Feb. 20th, do not en ov their position in the court-room.
